

**ADVANCED OUTCOMES IN THE MAJOR AREA
DISCIPLINE: BIOMEDICAL SCIENCES**

Discipline Outcomes

- | |
|-------------------------------------------------------------------------------------------------------------------------|
| 1. Accurately interpret the biological and chemical basis of phenomena and show the limitations of scientific analysis. |
| 2. Demonstrate proficient library, mathematical and computer skills in chemical and biological data gathering. |
| 3. Design, conduct and communicate biological and chemical experiments. |
| 4. Apply concepts of biology and chemistry to environmental, societal and biomedical issues. |
| 5. Work as a professional in the community. |
