

Creating Advanced Forums-Graded

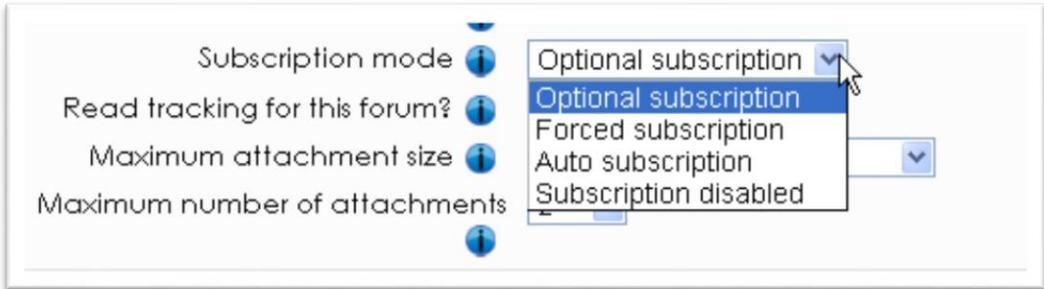

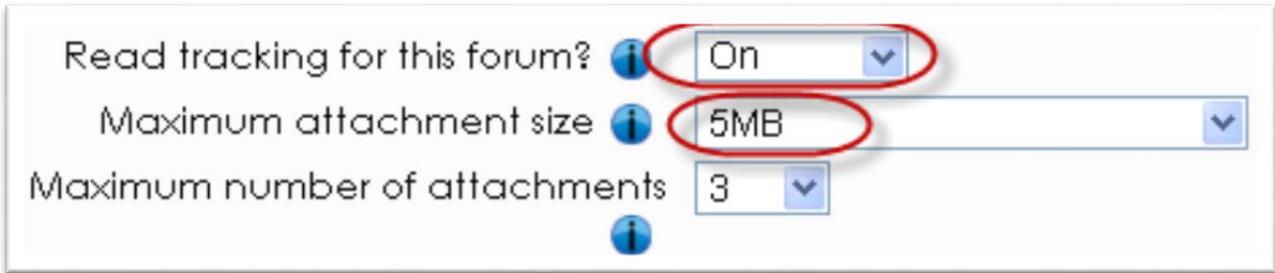

In Moodle, online discussion groups are called advanced forums. With advanced forums, you can facilitate online discussion between students. You can post a question and have students respond to it. Students can respond to each other's posts, too. People can upload files with their advanced forum posts, so you can even create an advanced forum where students post their work and other students respond to it with their comments.

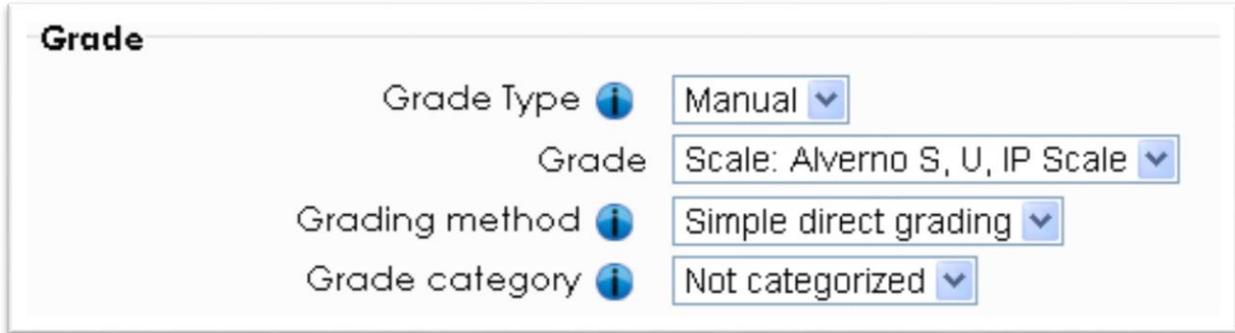

Do the following to create an advanced forum in Moodle that is **graded**. In other words, you will assign a score to students' forum posts in Moodle.

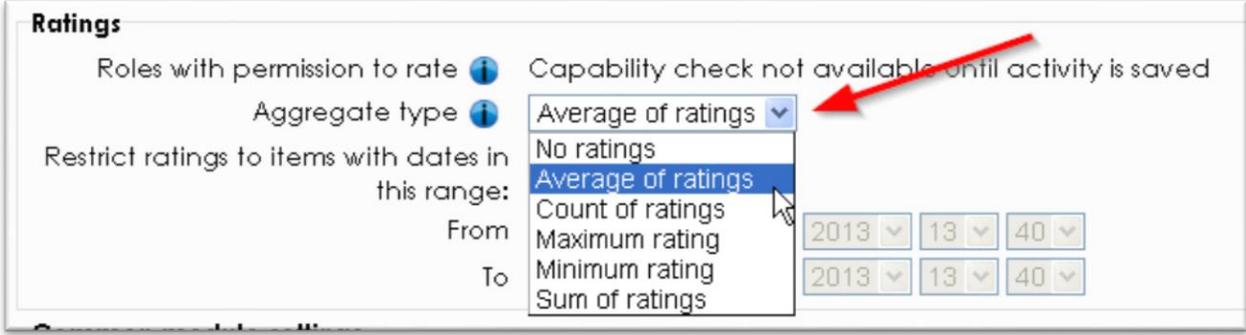

Task	Screen Shot
<ol style="list-style-type: none">1. Open your Moodle course.2. Click the Turn Editing On button in the top right corner.	 A screenshot of a Moodle interface showing a button labeled "Turn editing on". The button is rectangular with a light gray background and a thin border.
<ol style="list-style-type: none">3. Go to the topic where you want to insert the advanced forum.4. Click the green circle with the plus sign.	 A screenshot of a Moodle topic page. The page shows a folder icon labeled "Week 1" with the text "Here's the summary" below it. At the bottom, there is a "file change" link. In the top right corner, there is a green circle with a white plus sign, which is the icon for adding a new forum post. Other icons for editing, deleting, and viewing are also visible.
