

Directions for Connecting Macintosh OS X Computers to the Alverno College Network

Task	Screen Shot
1. From the Apple menu select System Preferences.	 A screenshot of the Apple menu in Mac OS X. The menu is open, showing options like 'About This Mac', 'Software Update...', 'App Store...', 'System Preferences...', 'Dock', 'Recent Items', 'Force Quit Adobe Reader', 'Sleep', 'Restart...', 'Shut Down...', and 'Log Out XP Admin...'. The 'System Preferences...' option is highlighted with a blue background and is enclosed in a red rectangular box.
2. Once the preferences screen has come up double-click on the Network icon.	 A screenshot of the System Preferences window. The window is titled 'System Preferences' and has a search bar at the top right. It displays various preference categories: Personal (General, Desktop & Screen Saver, Dock, Mission Control, Language & Text, Security & Privacy, Spotlight, Universal Access), Hardware (CDs & DVDs, Displays, Energy Saver, Keyboard, Mouse, Trackpad, Print & Scan, Sound), Internet & Wireless (iCloud, Mail, Contacts & Calendars, MobileMe, Network, Bluetooth, Sharing), System (Users & Groups, Parental Controls, Date & Time, Software Update, Speech, Time Machine, Startup Disk), and Other (Flash Player, Java, KeyAccess). The 'Network' icon, which is a globe, is highlighted with a red rectangular box.

Task	Screen Shot
<p>3. After clicking on the network icon you will see a screen similar to the one shown to the right:</p> <ol style="list-style-type: none"> If the lock icon appears locked you will need to unlock it by clicking on the icon and typing in an administrator password. If you do not know your administrator password you may need to talk to the person who set up your computer. In the left column select Ethernet. Next to Configure IPv4 select Using DHCP. Click on the Apply button and select quit from the system preferences menu. 	
<p>4. Under the Go menu select Connect to Server.</p>	
<p>5. You can connect to two different servers. You must type in the full path to the server on the Server Address line. The servers you can connect to are:</p> <ul style="list-style-type: none"> smb://stu1srv.alverno.edu/Users 	

Task	Screen Shot
<p><i>(This will open a folder from which you can navigate to your home folder)</i></p> <ul style="list-style-type: none"> • <code>smb://stu1srv.alverno.edu/courses</code> <i>(This will open a folder which contains folder course-related information from faculty)</i> 	
<p>6. You can save the path to any of these servers by clicking on the + button. You can then select the server from Favorite Servers instead of typing in the full address the next time you want to connect.</p>	
<p>7. If you haven't already done so, click on the Connect button. You will be prompted for a username and password. The username and password are the same as the username and password you use to log on to other computers on campus.</p>
