

APA Reference List Citation – Book

<http://www.alverno.edu/media/alvernocollege/library/pdfs/apabook.pdf>

Some tips:

Hanging indent – use a .5" hanging indent for all reference list citations. Not sure how? This [handout has directions](#).

Authors – do not spell out an author's first or middle name or include their credentials. For two to seven authors, an ampersand "&" precedes the last author's name. More information for citing multiple authors is on the [Purdue OWL site](#).

Titles – capitalize the first word of the title, first word of a subtitle (after a colon ":"), and [proper nouns](#) only.

Edition – do not include a notation for the first edition. Do include a notation for editions that follow the first (2nd, 3rd...).

Place of publication – use the [Postal abbreviation](#) for the state.

Publisher – do not include superfluous terms like **Inc.** or **Co.**
