# Comprehensive Database Searching – Multiple Databases

https://www.alverno.edu/media/alvernocollege/library/pdfs/multidatabase.pdf

1. Use any **EBSCOhost database** to add multiple databases to a literature search.

2. To access an EBSCOhost database, visit the Alverno Library homepage. Select Databases, and click Databases A-Z. Start with Academic Search Premier if you aren't sure which database to choose.

3. Click the "Choose Databases" link, this allows you to add multiple EBSCOhost databases to a search.

To search multiple databases, click the "Choose Databases" link.

4. A window will appear listing the EBSCOhost databases available to Alverno patrons. Select the databases that you wish to include in a search.

Choose which databases to include in a search. *Caution*, choosing too many databases may give you a very high number of results.

5. After you've selected your databases, click "OK". Enter your search terms and click "Search" to view your results.

6. *Please note*, the **"Advanced Search"** limits may not work properly when multiple databases are added to a search.
